EDUCATION

Bachelors of Technology in Mathematics and Computing

Aug '24 - May '28

Delhi Technological University | Delhi

CGPA: 7.59/10

PROJECTS

DTU Flux | Flutter, Dart, Firebase, Supabase

- Developed a **cross-platform academic management application** using **Flutter** with **role-based access control**, integrating **Firebase Firestore**, **Firebase Authentication**, **Firebase Cloud Messaging (FCM)**, **Cloud Storage**, and **Supabase Storage** for secure authentication, real-time data sync, notifications, and file uploads.
- Implemented core modules including **timetable management (SharedPreferences caching)**, **subject-wise attendance tracking**, **assignment lifecycle management**, and **SGPA/CGPA dashboards (fl_chart)** with structured state handling and optimized data flows.
- Enabled **real-time event streaming (Firestore)**, **CR attendance workflows**, and **in-app PDF/document viewing with caching (pdfx, Dio, path_provider)**, incorporating **Material 3 theming (light/dark mode)** and secure auth features (email/password, reset flows).

Voxa ChatBot | Flutter, Dart, Firebase, REST API

- Developed a **cross-platform AI chatbot application** using **Flutter** with a **client-server architecture**, integrating **Firebase Authentication** and **Cloud Firestore** for secure user management and **session-based chat persistence**, communicating with a **Python backend via HTTP POST APIs**.
- Implemented **emotion-aware chatbot responses** with detected emotion and confidence scoring, enabled **audio playback (audioplayers)**, and built **real-time message streaming (Firestore StreamBuilder)** with timestamp-ordered queries and animated UI using **SlideTransition** and **AnimationController**.
- Engineered supporting features including **session-based chat history**, **responsive UI scaling**, **light/dark theme adaptation**, and structured authentication workflows using libraries such as **HTTP**, **uuid**, **intl**, **Google Fonts**, **Fluttertoast**, **permission_handler**, and **flutter_dotenv**.

SafeStreet AI | Python, TensorFlow, YAMNet, Librosa, NumPy, Scikit-learn

- Built a **real-time urban threat detection system** using **YAMNet (TensorFlow) transfer learning** to classify **critical sounds** (screams, gunshots, crashes), achieving **85% accuracy** through an end-to-end **audio preprocessing and inference pipeline**.
- Developed a **web-based alert system** using **HTML**, **CSS**, **JavaScript** to generate **geo-tagged notifications** and enable **real-time threat visualization** for rapid incident reporting.

TECHNICAL SKILLS

Programming Languages: C++, Python, Dart, JavaScript (ES6+)

Frameworks & Libraries: Flutter, Express.js, Axios, NumPy, Pandas, Matplotlib

Databases: Firebase, MySQL

Backend & Web Technologies: Node.js, REST APIs, JWT Authentication, Async/Await, Promises, Middleware

Tools & Platforms: Git, GitHub, Visual Studio Code, Android Studio

CERTIFICATIONS

IBM – Developing Back-End Apps with Node.js and Express

Jan '26 - Feb '26

Credential ID: UH5FOCBHGI5Y

Verification: <https://coursera.org/verify/UH5FOCBHGI5Y>

ACHIEVEMENTS

- Smart India Hackathon (Internal Round 2025):** Selected among the **top 50 teams** (out of ~400) across 150+ problem statements for **PS ID SIH25002: Smart Tourist Safety Monitoring System**.
- Awarded the **Dell Aspire Scholarship**, selected as one of **80 recipients** across the university.

POSITIONS OF RESPONSIBILITY

Hospitality Co Head

Nov '25 - Present

Team Engifest | Delhi

- Coordinated **guest accommodation, on ground hospitality operations**, and **inter team communication** to ensure smooth **guest handling** during the festival.

Public Relations Head

Sep '25 - Present

Society for Industrial and Applied Mathematics (SIAM DTU) | Delhi

- Pioneered successful PR campaigns for flagship events, leading a team of 8+ to achieve over **700 registrations** and elevate cross-campus visibility using PR Drives
